Education

Pandit Deendayal Energy University

Bachelor of Technology in Computer Engineering

Jul 2023 – May 2027

CGPA: 9.71

Experience

Dynamic Dreamz

Full Stack Development Intern (Ongoing)

Jun 2025 – Present

Surat, Gujarat (Onsite)

- Built a backend-agnostic middleware adapter in Next.js decoupling the storefront from any commerce engine (Shopify, WooCommerce, MedusaJS), enabling swap-in backend integration without UI changes.
- Developed pixel-accurate storefronts from Figma designs and integrated MedusaJS v2 APIs with Next.js — product listing, filtering, and cart flows via SSR and route-based data fetching.
- Participated in code reviews and cross-functional collaboration in a Premier Shopify Partner environment serving real client deployments.

Projects

ClearClause – AI Legal Document Analyzer

[\[Live Project\]](#) [\[View Code\]](#)

React.js, Node.js, PostgreSQL (pgvector), Redis, BullMQ, Docker, Gemini API, Cohere

- Full RAG pipeline: vectorizes via Cohere `embed-english-v3.0`, stores `vector(1024)` embeddings in pgvector with IVFFlat index, retrieves top-5 semantically similar chunks for context-grounded multi-turn Q&A.
- 2 decoupled BullMQ async queues (doc processing + embedding) backed by Redis; SSE streaming; hybrid OCR fallback (PDF.js → Tesseract EN+HI); 5-state job lifecycle tracking.
- Multi-provider AI failover (Gemini 2.5 Flash → Groq Llama-3.3-70B); JWT + httpOnly refresh auth; cross-user document isolation verified through adversarial access testing.

DocGen – AI Automated Documentation Generator

[\[Live Project\]](#) [\[View Code\]](#)

React.js, Node.js, Express.js, Redis, BullMQ, Docker, MySQL, OpenRouter API

- 6-phase codebase analysis pipeline (stack detection, entry points, API routes, DB schemas, env vars, folder tree) that clones any public GitHub repo and generates a README + Developer Guide in under 10 minutes.
- Async BullMQ + Redis pipeline with 6-step real-time progress; Docker Compose orchestrates 5 services (React/Nginx, Express API, BullMQ worker, MySQL, Redis) with health-check dependency ordering.

StackIt – Minimal Q&A Forum

[\[Live Project\]](#) [\[View Code\]](#)

React.js, TailwindCSS, Node.js, Express.js, MongoDB

- Full-stack Q&A platform with question posting, answer submission, upvoting, and accepted-answer marking to surface high-quality community responses.
- Markdown rich text editor with AI-assisted tag generation; RESTful APIs and optimized MongoDB schemas with indexing for fast full-text search and paginated retrieval.

Technical Skills

Backend: Node.js, Express.js, REST APIs, JWT Authentication, BullMQ, Redis, Docker

Frontend: React.js, Next.js, TailwindCSS, HTML, CSS

Databases: PostgreSQL (pgvector), MySQL, MongoDB

Programming Languages: JavaScript, C++, Python, Java, C

Tools: Git, GitHub, Docker Compose, Postman

CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Design Patterns

Certificates & Achievements

GATE 2026 Qualified

[\[View Certificate\]](#)

Graduate Aptitude Test in Engineering (GATE) 2026 – Successfully Qualified

Oracle Cloud Infrastructure 2025 Foundations Associate

[\[View Certificate\]](#)

Certified in OCI architecture, core services (Compute, Storage, Networking, Database), security, and shared responsibility model

NPTEL – Understanding Incubation and Entrepreneurship

[\[View Certificate\]](#)

Completed certification covering startup ecosystems, incubation, innovation management, and entrepreneurial development
